

GLADIATOR

Hand crafted in stainless steel, the Gladiator is purpose built for the challenge and uses low pressure steam and natural bio-degradable detergents, which penetrates deep into the surface, lifting the gum, grime and contaminates. The waste is then uniquely vacuumed up for controlled disposal.

The MaxVac Gladiator uses a unique natural liquid formula, hot steam and variable brushes, giving a safe, deep thermo-mechanical clean. The process has a low water consumption and low pressure levels consequently pollution is removed without damaging the surface, joints or seals of the areas being worked upon.

FEATURES

- Quiet, clean and gentle
- Unique proven design
- Cost effective
- Complete gum and dirt removal
- Ecologically sound

TECHNICAL SPECIFICATION

Gasoline Motor	5hp
Variable Speed	Y
Hydrostatic Drive	Y
Forward & Reverse	Y
Brush Rotation	CW & CCW
Detergent Container	18 L
Width	700mm
Weight	165kg
Detachable Steam Plate	Y
Rear Vacuum Squeegee attachment	Y
